

CONNECTING REGIONS THROUGH EDUCATION

SKILLED PEOPLE FOR A GLOBAL AEROSPACE SECTOR

The Global Aerospace Campus is an international educational programme. It encompasses three interacting elements: **online courses** for aerospace students and professionals, an international **conference series** and **joint research activities**.

Our Goal

The Global Aerospace Campus connects regions through education. For this purpose, the Global Aerospace Campus makes scientific research accessible to a wider public, it provides better access to experts and it brings research and teaching closer together.

eLearning

Digital Learning is constantly gaining in significance. The Global Aerospace Campus online courses with their interdisciplinary approach increase learning opportunities, boost the exchange of knowledge and help to get a better scientific understanding.
