CONNECTING REGIONS THROUGH EDUCATION
The Global Aerospace Campus is an international educational programme. It encompasses three interacting elements: online courses for aerospace students and professionals, an international conference series and joint research activities.

**Our Goal**

The Global Aerospace Campus connects regions through education. For this purpose, the Global Aerospace Campus makes scientific research accessible to a wider public, it provides better access to experts and it brings research and teaching closer together.

**eLearning**

Digital Learning is constantly gaining in significance. The Global Aerospace Campus online courses with their interdisciplinary approach increase learning opportunities, boost the exchange of knowledge and help to get a better scientific understanding.
